PROFESSIONAL SUMMARY

Master of Software Engineering student at Yoobee College, Auckland, with hands-on experience in full-stack web development, technical data analysis, and client-facing roles. Skilled in FastAPI, Flask, React.js, REST APIs, JWT authentication, SQLite, and deployment workflows. Proven real-world IT experience as a Tech Analyst at eClerx Services, with demonstrated strengths in technical troubleshooting, data analysis, and cross-functional team communication. Currently employed in New Zealand while completing postgraduate studies, demonstrating strong work ethic and time management.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, JavaScript, SQL, HTML5, CSS3
- **Frontend Development:** React.js, React Hooks (useState, useEffect), Tailwind CSS, Responsive Web Design, API Integration
- **Backend Development:** FastAPI, Flask, REST APIs, JWT Authentication & Authorization, CRUD Operations, Routing, Pagination, Pydantic Models
- **Databases & Tools:** PostgreSQL, SQLite, SQL, Git, GitHub, Docker, Docker Compose, VS Code, Postman, Vercel, Render
- **Core Concepts:** Data Structures and Algorithms, Dynamic Programming (DP), Object-Oriented Programming, Problem Solving, Frontend-Backend Integration
- **Soft Skills:** Client Communication, Technical Troubleshooting, Team Collaboration, Time Management, Attention to Detail

WORK EXPERIENCE

Team Member — Replenishment — Woolworths New Zealand, Auckland

May 2026 – Present

- Managed stock replenishment and inventory workflows, ensuring accurate product availability across store departments in a high-volume retail environment.
- Applied systematic attention to detail and process discipline through structured restocking procedures and stock management.
- Balanced part-time employment with full-time postgraduate studies in Software Engineering, demonstrating strong time management and commitment.

Junior Software Engineer — Finex Lifecare, India

June 2025 – December 2025

- Built and maintained features in web application used by internal stakeholders.
- Refactored backend endpoints and validation logic to improve API reliability and reduce support issues.
- Collaborated with team in planning, code reviews, and sprint planning to deliver weekly releases.
- Worked with Docker, GitHub, etc. tech to support development, and deployment workflows.

Software Engineering Intern — Finex Lifecare, India

January 2025 – June 2025

- Built small frontend features and wired them up to backend APIs in a healthcare web application.
- Implemented CRUD operations and did basic API testing, improving reliability for everyday internal use.
- Followed version control and code review practices, and learned how Docker-based setups keep dev and prod environments aligned.
- Contributed to team delivery by completing assigned tasks and supporting daily progress.

Sales & Marketing Intern — Master-O (InspireOne Technologies), India

June 2024 – September 2024

- Used CRM and digital tools to manage sales pipelines and analyse outreach data to optimise marketing strategies.
- Applied data-driven insights to improve client engagement, working cross-functionally with technology and business teams.
- Contributed to enhancing customer experience through targeted communication and technology-driven solutions.

Tech Analyst — eClerx Services Limited, India

February 2022 – March 2023

- Analysed client data and resolved technical issues to enhance service offerings; recognised as top performer during the training period.
- Collaborated directly with clients to troubleshoot technical problems, improving customer satisfaction and service efficiency.
- Managed multiple concurrent tasks in a fast-paced environment, developing strong problem-solving and attention-to-detail skills.
- Communicated effectively across client and internal teams to deliver timely technical resolutions.

PROJECTS

Full Stack Task Manager Application [\[Live Demo\]](#) [\[GitHub\]](#)

- Designed and built a full-stack task management application using React.js for the frontend and FastAPI for the backend, with JWT-based user authentication.
- Implemented secure login, user registration, and protected routes to support authenticated access and role-based functionality.
- Developed full CRUD operations, task pagination, and a responsive UI with seamless frontend-backend integration.
- Containerized the application using Docker and Docker Compose for consistent local development and reproducible setup.
- Deployed to production using Vercel for the frontend and Render for the backend, enabling live public access.

Blog Management System [\[Live Demo\]](#) [\[GitHub\]](#)

- Built a full-featured backend REST API using FastAPI, implementing user authentication, authorisation, and profile management with secure password reset flows.
- Implemented forgot password and reset password flows with email-based recovery links (Google/email integration).
- Added image upload functionality, pagination, and full CRUD operations for blog posts and user profiles.
- Integrated SQLite with async SQLAlchemy ORM and deployed the backend live on Render with automatic GitHub-linked deployment.

Frontend Development Projects [\[Live Demo\]](#) [\[GitHub\]](#)

- Built an HTML & CSS YouTube clone applying responsive layout, Flexbox/Grid design principles, and UI component structuring.
- Completed an Amazon JavaScript project to strengthen DOM manipulation, event handling, and frontend API interaction skills.

EDUCATION

Master of Software Engineering — Yoobee College, Auckland, New Zealand

April 2026 – Present

Bachelor of Computer Applications (BCA) — Panjab University, India

2020 – 2023

ADDITIONAL INFORMATION

- English: Fluent | Hindi: Native | Punjabi: Fluent
- Legally authorised to work part-time in New Zealand under Student Visa conditions, and full-time during internship/summer periods as required.
